Gary and Rafael,

We have received the results of the pipeline trace (attached), which was started at the pipeline cut point near Sunray Road and lead to the former docking facility. The pipeline route, which has been identified in the field with stakes and is shown in the attached photographs is different than previous indications. In the future all maps will reflect this orientation.

We are in the process of developing a plan to enter the pipelines to evacuate and material that may be left in the pipelines. We will notify the EPA prior to performing any pipeline clean out activities.
